

2017 Pediatric Subspecialty Physician Compensation Survey

Information Session

February 2017

CONFIDENTIAL

Agenda

- I. Introduction
- II. Survey Overview
- III. ECGVault Overview
- IV. 2017 Membership
- Appendix A 2016 Survey Members
- Appendix B 2016 Reported Specialties
- Appendix C Sample Pediatric CPT Code Profiler Reports

About ECG

We're leading healthcare forward, one organization at a time.

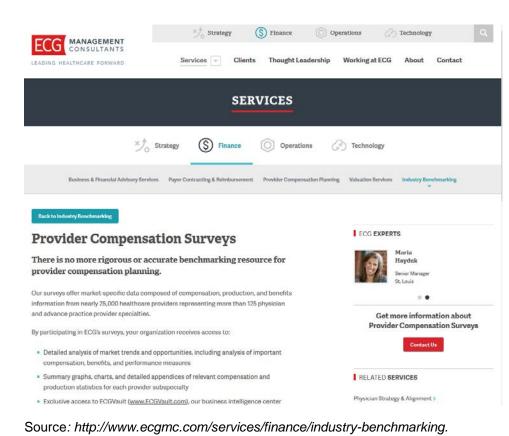

With four core competencies of **strategy**, **finance**, **technology**, and **operations**, we provide smart counsel and pragmatic and sustainable solutions that are transforming healthcare delivery.

We're **strategic advisers** to both pediatric and adult health organizations.

ECG's Custom Surveys

ECG's custom surveys emerged from our experience in working with medical groups and academic departments to redesign their compensation plans. Today, our custom surveys are one of our core services and encompass a wide range of areas.

- Physician Compensation Survey (eighteenth year)
- » Pediatric Subspecialty Physician Compensation Survey (eleventh year)
- » CPT Code Profiler tool (fifth year)
- » Medical Group Cost and Infrastructure Survey (third year)
- » Various other surveys

Providing Critical Data

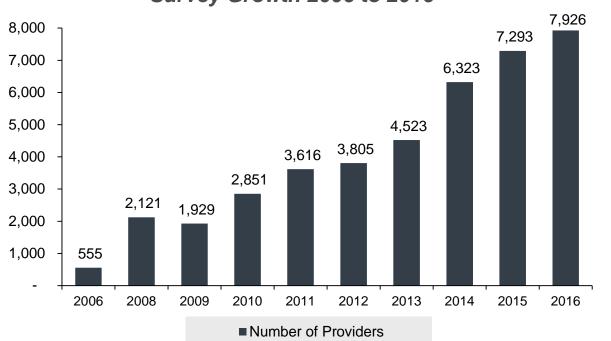

Survey members utilize data and benchmarks from our surveys to inform themselves on key issues and support various analyses in their organizations, including:

- » Annual market assessments of compensation and production for physicians and advanced practice providers (APPs).
- » Compensation plan redesign for physicians and APPs.
- » Operations improvement projects that include productivity evaluation and benchmarking at both the individual provider and specialty levels.
- » Audits and market comparisons of coding practices (individual provider and specialty levels).
- » Fair market value assessments and opinions.
- » Provider benefit benchmarking and design.
- » Market payor contracting strategies.
- » Recruiting and retention benchmarking.

Our surveys provide members with access to data that is more in-depth than what is offered by, or not available from, other industry sources.

Survey Year-Over-Year Growth

With compensation and production data from 7,926 pediatric providers and organizationlevel data from 46 of the nation's premier children's organizations, ECG's pediatric survey is the most comprehensive source of provider performance data available in the market.

Survey Growth 2006 to 2016

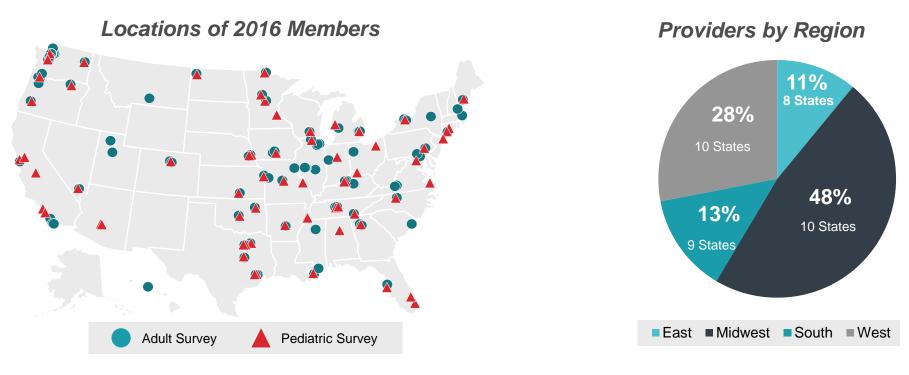

The pediatric survey has a loyal base of members from year to year, with an average retention rate of more than 70% over the last five years. The typical organization has been a member of the pediatric survey for between four and five years.

Source: ECG 2006 to 2016 pediatric surveys. *NOTE:* This survey was not conducted in 2007.

Geographic Distribution

The geographic reach of the pediatric survey has expanded to 37 states, with a majority of providers in 2016 from the Midwest and West regions.

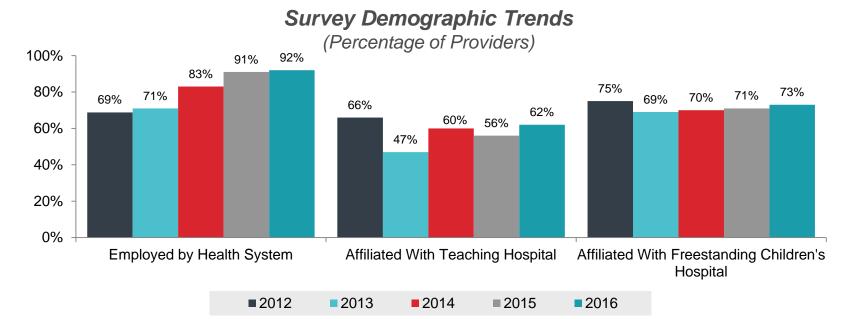

Source: ECG 2016 national and pediatric surveys.

ECG also conducts the national *Physician Compensation Survey*, which this year includes data for over 26,000 providers.

Provider Demographics

Over the last five years, there has been a steady increase in the proportion of survey providers that are employed by a health system, mirroring broader growth and employment trends in the market.

Source: ECG 2012 to 2016 pediatric surveys.

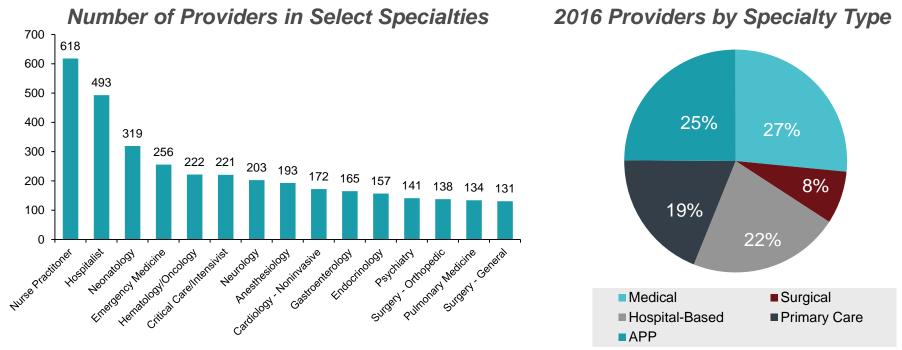

In addition, providers in the survey are most commonly practicing in a teaching hospital/environment (62%) and affiliated with a freestanding children's hospital (73%).

CONFIDENTIAL 1275.011\384615(pptx)-E2 DD 2-2-17 8

MANAGEMENT

Specialty Representation

Benchmarks are available for 57 pediatric specialties: 27 medical, 11 surgical, 11 hospital-based, 2 primary care, and 6 unique types of APPs.

Source: ECG 2016 pediatric survey.

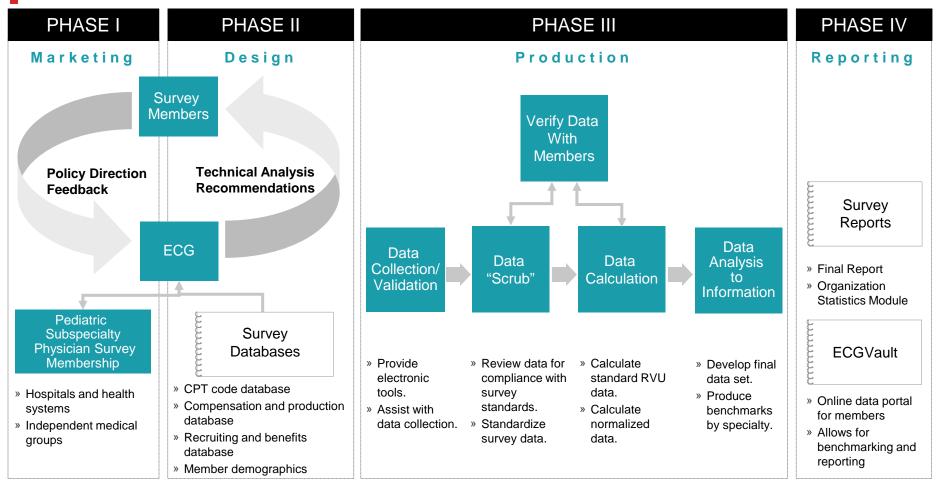

Pediatric APPs represent one-quarter of the providers in the survey, making 2016 our most comprehensive data set to date for these providers.

ECG's Survey Methodology

Our survey methodology emphasizes data consistency and quality.

Scope of the Survey

ECG's survey is a comprehensive study of provider performance and captures data in six schedules, which include participant demographics as well as compensation, benefits, productivity, recruitment, and other critical operating statistics.

SCHEDULE A	Contact Information — Includes authorized contacts
SCHEDULE B	Organization Profile — Includes organization-level demographics, key statistics data, etc.
SCHEDULE C	Compensation/Incentive Plans — Includes data on physician and APP compensation plan structure, performance indicators (production- and nonproduction-based), and quality incentives
SCHEDULE D	Recruiting and Benefits — Includes data on recruiting packages/benefits, starting salaries, recruiting efforts, and cost/type of provider benefits (e.g., medical, retirement, paid time off [PTO], CME)
SCHEDULE E	Operations — Includes the utilization and practice models of APPs as well as patient access information
SCHEDULE F	Provider Data — Includes provider-level data (physicians and APPs), such as FTEs, compensation, gross and net revenue, academic rank, panel size, CPT code counts, benefits, clinical weeks worked, scheduled office hours, etc.

Schedules A–E are completed via our secure web-based proprietary survey tool. Schedule F is completed using Microsoft Excel.

Reported Metrics and Key Statistics

ECGVault provides access to the comprehensive collection of metrics available in the survey.

SELECT	COMPENSATION, PRODUCTION, AND BENEFIT METRICS BY SPECIALTY		SELECT COMPENSATION PLAN, RECRUITMENT, AND OTHER KEY INFORMATION/STATISTICS

Exclusive Member Benefits

As members of ECG's survey, organizations have exclusive access to:

- » ECGVault This data portal contains current and historical ECG physician and APP performance benchmarks at the market, organization, and provider levels.
- » Final Report This document summarizes key year-over-year market trends for all components of the survey.
- » *Members-Only Webinar* Hosted in the fall, this webinar focuses on key compensation, production, recruiting, and benefit trends of the 2017 survey.
- » ECG's Survey Team Through the survey process, we cultivate a relationship with each of our members. By taking the time to interact with our members, we ensure that we understand your organization and data, which translates into the most accurate and reliable benchmarks available in the industry.

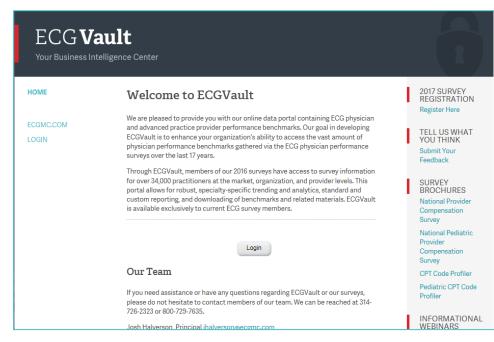

ECG's survey approach, methodology, and value-added deliverables set us apart from other industry surveys.

Background

ECGVault provides survey members with the power to analyze current and historical physician and APP performance benchmarks at the market, organization, and provider levels.

- » ECGVault is a business intelligence tool that supports a variety of provider performance analyses and assessments in your organization.
 - Online and secure
 - > Members only
 - Current and historical data (back to 2006)
- » Survey members' data is already loaded into the database and reports.
- » Data includes provider-level compensation and production data, as well as organization-level statistics and information.
- » Reporting options allow for significant customization by members.

Survey members receive a confidential login and password specific to the organization.

Your Business Intelligence Center

ECGVault contains three primary types of reporting options:

- » Dynamic Reports These reports allow for robust, specialty-specific trending and analysis capabilities, as well as standard and custom reporting, downloading of benchmarks, and access to related materials.
- » Static Reports These reports include the benchmark tables for physicians and APPs in Adobe PDF format. The benchmark tables provide averages and quartiles by specialty for each of the compensation and production metrics in ECG's surveys.
- » Organization Statistics Module In addition to the organization data provided in ECG's Final Report, comprehensive market data is available via our Organization Statistics Module.

ECGVault now includes the Pediatric CPT Code Profiler, an additional product that members can subscribe to.

ECGVault: Dynamic Reports

Within Dynamic Reports, there are currently 10 reporting options in ECGVault that allow survey members to access current-year, as well as historical, physician performance benchmarks for the organization and the market.

- » Benchmark Tables
- » Custom Recruiting Tool
- » Metric Scattergram
- » Tabular Reports
- » Trending by Organization
- » Trending by Provider
- » Benchmarking by Organization
- » Benchmarking by Provider
- » Comparison Charts by Organization
- » Comparison Charts by Provider

Metric Compensation

Year	2015
Value	● Median ○ Averag
Report Type	All Organizations
Provider Type	Selected Criteria
Specialty	Selected Criteria
Region	All
Experience	All
Tenure	All
Compensation	All

ECG is currently conducting customized ECGVault demonstrations for interested organizations.

Reporting Criteria

Reporting criteria allow for robust benchmarking and trending tailored to your needs. Criteria include organization-level demographics such as type of ownership structure, size, and region, as well as provider-level filters, including experience, clinical effort, academic rank/tenure, and compensation plan type.

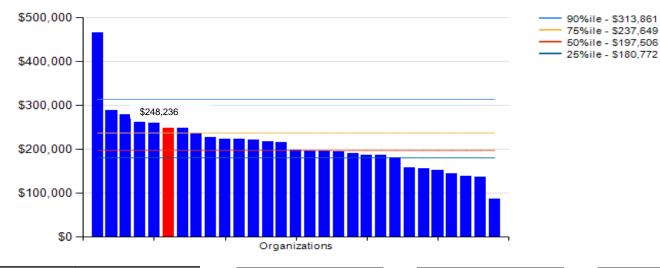

Benchmark Tables - Report Criteria

Metric	Clinical Compensation		•	Previous	Next	GO Run Report	📄 Print

Comparison Charts

Comparison charts allow specialty-specific comparisons by organization and provider along various metrics. The example below demonstrates organization-level medians for three metrics.

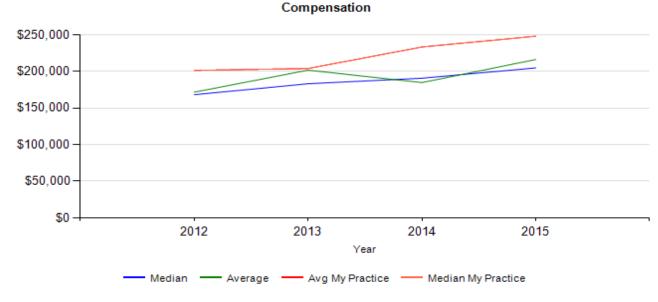

Trending Reports by Organization

Organization-level trending reports display how each specialty has performed over time compared to the market.

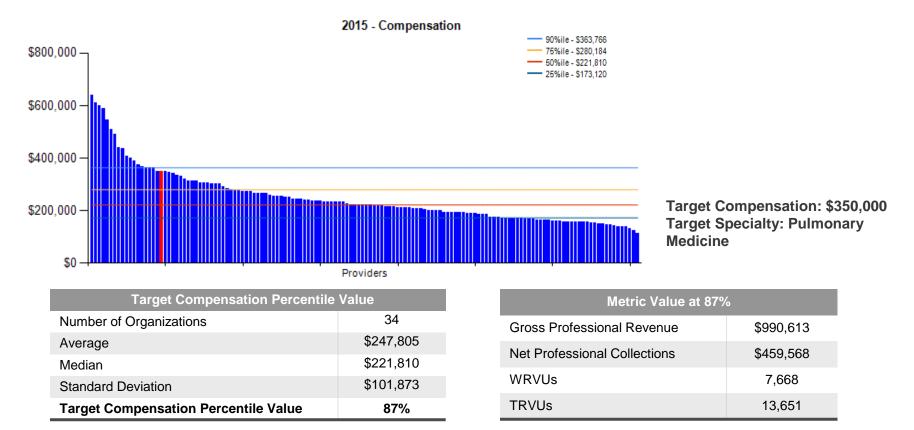

Year	Median for All Practices	Average for All Practices	Average for My Practice
2012	\$168,279	\$171,746	\$201,561
2013	\$183,212	\$201,819	\$204,038
2014	\$190,830	\$184,854	\$233,455
2015	\$204,866	\$216,317	\$248,236

Custom Recruiting Tool

The custom recruiting tool can be utilized to determine how proposed compensation compares to the market. In addition, the tool offers production benchmarks that are consistent with the proposed compensation level.

23

Pediatric CPT Code Profiler

The Pediatric CPT Code Profiler transforms provider-level CPT code data into meaningful information and analytics on practice profiles, top-performed CPT codes, and the distribution of evaluation and management (E&M) codes.

- » Specialty Practice Profile Summary Reports Identify variances in your physicians' CPT code profiles compared to providers within your medical group and the market; key metrics include a summary of WRVU and TRVU productivity, the distribution of WRVUs among CPT code categories (i.e., E&M, medicine, ancillary, and surgery) and subcategories, and the average acuity of procedures
- » Provider CPT Code Frequency Reports Include reports for your providers, specialty, group of providers, and the market; data sets can be customized by procedure category and subcategory, place of service, inpatient/outpatient provider responsibilities, medical group demographics, and several other key practice differentiators; CPT code reports include procedure code ranking of frequency for market variance comparisons
- » Provider CPT Code E&M Distribution Reports by Specialty Include the isolation of E&M frequency for place of service, as well as provider and organization demographics

The Pediatric CPT Code Profiler is available to pediatric compensation survey members at a discounted fee. Sample reports are shown in APPENDIX C.

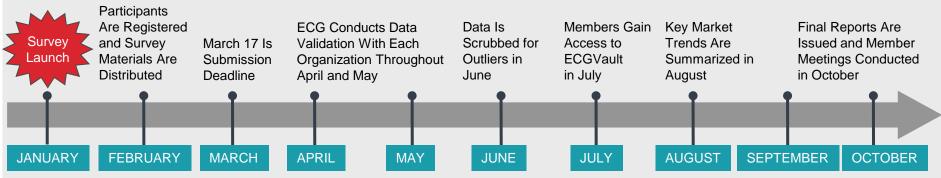

Survey Timeline

ECG's 2017 surveys will launch at the end of January, and access to the data and online reporting capabilities will be available via ECGVault in July.

2017 SURVEY TIMELINE

The Final Reports will be distributed and member meetings will be conducted in early October.

Membership Fee

Membership in ECG's survey is typically \$5,000 per year. This fee is waived for new organizations; thus, there is no cost for membership in the first year of participation.

- » The annual membership fee is all-inclusive and covers the cost of performing the survey.
- » There is no additional cost to obtain/access the compensation and production survey reports available via ECGVault.
 - > Unlimited users
 - › Available 24/7
 - > Current and historical data accessible
- » There is no additional fee:
 - > To participate in the member meeting.
 - > For most custom data requests.

Next Steps

We look forward to working with you during ECG's 2017 Pediatric Subspecialty Physician Compensation Survey.

- » Register Register your organization for ECG's 2017 Pediatric Subspecialty Physician Compensation Survey.
- » Receive Welcome and Survey Materials The 2017 survey materials will be distributed via email in February to registered organizations.
- » Submit Data Completed survey materials/data are due on March 17.
- » Access Available Support We work with each organization during the submission process and are available to answer any questions that may arise as you complete the survey.

(?) MORE QUESTIONS

Please contact Angie Collins at 314-726-2323 or *acollins* @*ecgmc.com.*

- » Q&A session
- » Custom ECGVault demonstration
- » Review of data requirements

Online registration is currently open at http://www.ecgmc.com/services/finance/ industry-benchmarking/survey-registration.

Appendix C Sample Pediatric CPT Code Profiler Reports

Sample Pediatric CPT Code Profiler Reports — Report Criteria

CPT code reports can be customized using various report criteria to further enhance your analysis.

ORGANIZATION-LEVEL REPORT CRITERIA

- » Organization Size Pulls data for providers who practice within groups of various sizes
- » Ownership Selects providers who practice within integrated health systems, providers who practice within independent medical groups, or all providers
- » Region Limits data to providers who are practicing within a specific region(s)

PROVIDER-LEVEL REPORT CRITERIA

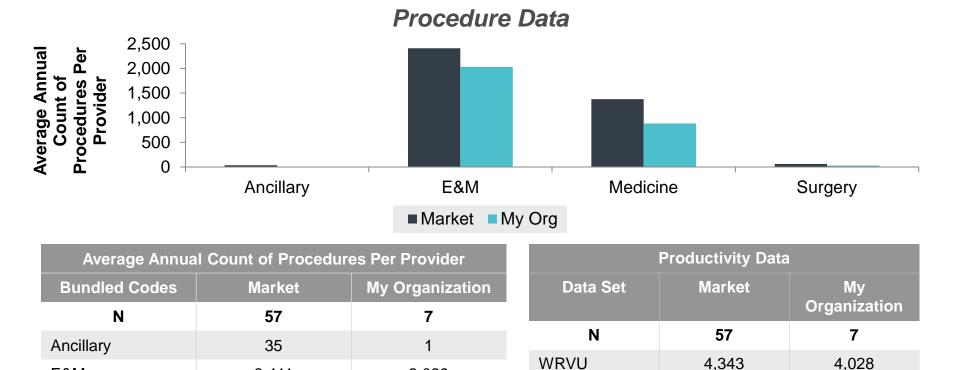

- » Quartile Pulls the CPT activity of providers above the median or above the 75th percentile for WRVUs
- » Experience Selects data for providers who are new, providers who are established, or all providers
- » Clinical FTE Selects providers within a specific clinical FTE range
- » Inpatient/Outpatient Responsibilities Isolates the CPT activity of providers working in the inpatient environment, outpatient environment, or both environments
- » Medical Home Selects providers who are participating in a medical home

- » State Limits data to providers who are practicing within a specific state(s)
- » Payor Pulls the CPT code data for codes billed to Medicare or non-Medicare payors
- » Procedure Category Isolates the CPT activity by E&M, ancillary, medicine, and surgery
- » Procedure Subcategory Isolates the CPT activity for 42 subcategories focused largely on body systems
- » Grouped CPT Codes Isolates the CPT activity for specified ranges of codes
- » Place of Service Isolates the CPT activity for one or more places of service (e.g., physician office)

Sample Pediatric CPT Code Profiler Reports — Practice Profile Report

Key metrics include a summary of procedure counts and RVUs, as well as the distribution of WRVUs among CPT code categories and subcategories.

Sample Pediatric CPT Code Profiler Reports — CPT Code Distribution Report

Distribution reports allow for the isolation of E&M frequency for Medicare and non-Medicare patient activity, place of service, and provider and organization demographics.

CPT Code Distribution — Average Per Provider by Percentage

Survey members that subscribe to the CPT Code Profiler are able to see the distribution reports by provider in addition to the market comparison.
