ECG's CPT Code Profile tool is the industry's most rigorous and accurate CPT Code benchmarking resource for provider compensation planning.

CPT Code Profile Tool Benefits

With a subscription to ECG's CPT Code Profile Tool, your organization receives access to powerful CPT code profiling reports and online benchmarking tools that can be customized, including the following:

- **ECGVault (www.ecgvault.com)**
Access robust organization, market, and provider CPT performance trends by specialty through ECG's online portal.
 - Build standard and custom reports for your providers and the market,
 - Download benchmark materials (e.g., graphs, tables).
- **Provider CPT Code Frequency Reports**
Gain an understanding of the top CPT codes at the specialty, provider, and market levels with data sets customized by the following:
 - Procedure categories and subcategories
 - Type of service, inpatient and outpatient procedures, and medical group demographic subcategories
 - Key practice differentiators
- **Provider E&M Distribution Reports by Specialty,**
Access reports for office, inpatient, and emergency department visits. Distribution reports include the isolation of E&M frequency by place of service and provider and organization demographics.
- **Specialty Practice Profile Summary Reports**
Identify variances in practice profiles for providers in the medical group and the market with key metrics, including:
 - Work RVUs (WRVUs).
 - Total RVUs (TRVUs).
 - Distribution of volumes, WRVUs, and TRVUs by procedure category and subcategories.
 - Average acuity of procedures.

Operations

ECG's CPT Code Profile Tool provides access to CPT code data for 159 physician specialties and 23 types of APPs.

The profiler enables users to generate reports that allow for a better understanding of the impact of physician and APP CPT coding on practice economics, in addition to helping identify where changes and improvements may be warranted.

Our CPT Code Profiler:

- Aids in the analysis of individual providers' procedure codes and encounter type distribution, including new and established patient visits and consultations.
- Compares individual coding profiles and performance to the overall market.

The CPT Code Profiler is built from ECG's proprietary physician and APP compensation surveys, wherein we calculate productivity from CPT code-level data.

It uses clear, uniformly applied definitions and a structured data validation process to transform member responses into useful information. RVU metrics for our surveys are calculated and published using the Medicare Physician Fee Schedule. To ensure data accuracy, we define each provider's clinical and nonclinical full-time equivalents in detail.

About ECG

With knowledge and expertise built over the course of nearly 50 years, ECG is a national consulting firm that is leading healthcare forward. ECG offers a broad range of strategic, financial, operational, and technology-related consulting services to providers, building multidisciplinary teams to meet each client's unique needs—from discrete operational issues to enterprisewide strategic and financial challenges.

ECG is an industry leader, offering specialized expertise to hospitals, health systems, medical groups, academic medical centers, children's hospitals, ambulatory surgery centers, and healthcare payers. Part of Siemens Healthineers' global enterprise services practice, ECG's subject matter experts deliver smart counsel and pragmatic solutions.

ECG's annual provider performance surveys include the Physician and APP Compensation Survey and the Pediatric Subspecialty Physician and APP Compensation Survey.
